

Schroders Schroder International Selection Fund Global High Yield

A Accumulation USD | Data as at 31.10.2022

Important Information

The fund invests primarily in below investment grade fixed and floating rate securities .

- The fund invests in debt securities which may be subject to interest rate, credit and counterparty risks and risk relating to below investment grade and unrated debt securities, etc.
- Investment in sovereign debt obligations which may expose the fund to political, social and economic risks. The fund may suffer significant losses upon defaults by government entities.
- The fund may invest in emerging markets and concentrated region and subject to ownership and custody risks, political and economic risks, market and settlement risks, etc. .
- The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
- For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

The Fund aims to provide income and capital growth in excess of the Bloomberg Barclays Global HYxCMBSxEMGIndex USD Hedged 2% cap after fees have been deducted over a three to five year period by investing in below investment grade fixed and floating rate securities issued worldwide.

Share class performance (Cumulative)

Effective duration (years)	4.1	-

Source: Morningstar. The above ratios are based on NAV to NAV price based performance data.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated NAV to NAV (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Benchmark and corporate action information

The fund's performance should be assessed against its target benchmark being to exceed the Bloomberg Barclays Global HYxCMBSxEMG index USD Hedged 2% cap and compared against the Morningstar Global High Yield Category. The fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The Bloomberg Barclays Global HYxCMBS xEMG index USD Hedged 2% cap Issuer Capped Bond Index measures the market of non-investment grade, fixed-rate, taxable corporate bonds. The index follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).

Important information

The fund has environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). For information on sustainability-related aspects of this fund please go to www.schroders.com
